

Questions:

1. Original:

Best media/production (type, source, length, studio) forms for a popular anime?

Changed to:

What are the most popular media/production (type, source, episodes, rating) attributes (popular based on score, members, favorites, and user review scores)?

- Episode ranges (1, 2-12, 13-24, 25-52, 53+)
- Led to follow up question of whether these results change when filtering to only take animes that have been scored by ≥ 1000 users (yardstick decided by low stats of animes, and unfamiliarity w/ less than 1000 scoredBy value when inspecting animes sorted by scoredBy)

2. Original:

What attributes are most important for a popular anime (genres, scoring categories, rating, etc)?

Changed to:

For each scoring category, what are the best and worst genres?

- Led to follow up question of do female users tend to give higher scores?

3. Original:

Most popular types of anime by user attributes (gender, age)?

Changed to:

What are users' most favorite animes by their attributes (gender, age)?

- Led to follow up question of whether or not these resulting top anime actually correspond to their age/gender demographic genres ('Kids', 'Shounen': young males, 'Shoujo': young girls, 'Seinen': teenage/older men, 'Josei': teenage/older women)
